

Important announcement to our valued Clients
and Partners:

Shutdown of 3G network by Telekom and Vodafone for the 31st of June 2021 and O2 (Telefonica) for the 31st of December 2021

Affected devices / modules:	Successor with 4G support
900-2H681	Flexy20500 + FLB3204 (FLB3203 / FLB3205)
900-2H682	Flexy20500 + FLB3204 (FLB3203 / FLB3205)
900-2C580	EC6133G
EC6133D	EC6133G
FLB3202	FLB3204

If the parameter for the „Connection Type“ is set to automatic, the device will fall back to the 2G network when the provider shut down the 3G network.

Please notice, that the loss of speed due to the fallback to 2G can be quite enormous,
from up to 42000 kb/s with 3G+ to 256 kb/s with 2G (EDGE)

This can lead to the fact that remote maintenance as it was possible with 3G/3G+ is no longer possible due to the automatic fall back to the 2G network (for example VNC connection).

If you have any technical queries, please do not hesitate to get in touch with our support on the phone number: +49 9132 744 1150 or by email: support@yaskawa.eu.com
